RUSSIAN ACADEMY OF SCIENCES. IZVESTIYA. MATHEMATICS

Том 57, №№ 4–6, 1993

Volume 43, Numbers 1–3 Pages 1–616

Volume Index of Authors

Ayupov, Sh. A. and Yadgorov, N. Zh. Geometry of the state space of modular Jordan algebras 581

Babets, V. A. Pseudoforms with negative curvature on $\mathbf{CP}_n$. II 119

Barabanov, O. O. and Zhikov, V. V. The limit load and homogenization 205

Belov, A. S. On an extremal problem on the minimum of a trigonometric polynomial 593

Èntov, M. R. On the real preimages of a real point under the Lyashko-Looijenga covering for simple singularities 363

Fesenko, Ivan B. Local class field theory: Perfect residue field case 65

Filippov, A. F. Classification of compact invariant sets of dynamical systems . 517

Gadyl'shin, R. R. Splitting of the poles of a Helmholtz resonator 233

Grigoryan, M. G. On some properties of orthogonal systems 261

Karatsuba, A. A. On the zeros of arithmetic Dirichlet series without Euler product 193

Klyachin, V. A. Maximal tubular surfaces of arbitrary codimension in Minkowski space 105

Kolesov, Yu. S. A special relaxation cycle of a system of differential-difference equations 607

Krasnov, V. A. Algebraic cycles on a real algebraic GM-manifold and their applications 141

——, On cohomology classes defined by the real points of a real algebraic GM-surface 385

Kuzin, I. A. Comparison theorems for variational problems and their application to elliptic equations in $\mathbf{R}^N$ 331

Loginov, A. I. and Shul'man, V. S. Vector-valued duality for modules over Banach algebras 1

Naumkin, P. I. Large-time asymptotics of solutions of the nonlinear Schrödinger equation in $2 + 1$ dimensions 373

Naumkin, P. I. and Shishmarëv, I. A. Asymptotics, as $t \to \infty$, of the solution of a nonlinear equation with weak dissipation and dispersion 443

Odinokov, O. V. Differential operators of infinite order in some spaces of entire functions 347

Polishchuk, A. E. I. N. Bernshteĭn-I. M. Gel′fand-S. I. Gel′fand equivalence for triangulated categories generated by helixes 127
Pron′kin, V. S. On quasiperiodic solutions of the matrix Riccati equation 455
Rakhmonov, Z. Kh. Theorem on the mean value of $\psi(x, \chi)$, and its applications 49
Romanov, A. V. Sharp estimates of the dimension of inertial manifolds for nonlinear parabolic equations 31
Rozhkov, A. V. Centralizers of elements in a group of tree automorphisms ... 471
Rustamov, Kh. P. On approximation of functions on the sphere 311
Shapiro, M. Z. Topology of the space of nondegenerate curves 291
Shishmarēv, I. A. See Naumkin, P. I.
Shlyk, V. A. Normal domains and removable singularities 83
Shokurov, V. V. An addendum to the paper "3-fold log flips" 527
Shtepin, V. V. Intermediate Lie algebras and their finite-dimensional representations 559
Shul′man, V. S. See Loginov, A. I.
Tankeev, S. G. Abelian varieties and the general Hodge conjecture 179
Troshina, T. L. The degree of the top Segre class of the standard vector bundle on the Hilbert scheme $\mathrm{Hilb}^4 S$ of an algebraic surface S 493
Tunitskiĭ, D. V. The Cauchy problem for hyperbolic Monge-Ampère equations 161
Yadgorov, N. Zh. See Ayupov, Sh. A.
Zelenov, E. I. The infinite-dimensional p-adic symplectic group 421
Zhelobenko, D. P. The algebra of quantum bosons, the Schubert filtration, and Lusztig bases 397
Zhikov, V. V. See Barabanov, O. O.
